

# Permission for Telehealth Visits

## How does telehealth help me?

- You don't have to go to a clinic or hospital to see your provider.
- You won't risk getting sick from other people.

## Can telehealth be bad for me?

- You and your provider won't be in the same room, so it may feel different than an office visit.
- Your provider may decide you still need an office visit.
- Technical problems may interrupt or stop your visit before you are done.

## Will my telehealth visit be private?

- We will not record visits with your provider.
- If people are close to you, they may hear something you did not want them to know. You should be in a private place, so other people cannot hear you.
- We use telehealth technology that is designed to protect your privacy.
- If you use the Internet for telehealth, use a network that is private and secure.
- There is a very small chance that someone could use technology to hear or see your telehealth visit.

## What if I try telehealth and don't like it?

- You can stop using telehealth any time, even during a telehealth visit.
- Do I have to sign this document?
  - No. Only sign this document if you want to use telehealth.
